

**LH 4940 CNV/LFY****99 RM****POSITIONING & MANAGEMENT**

You asked for it and here it is! LH 4940 Conv/Lfy is a big, tall, robust silage-specific hybrid released in a conventional trait platform. Big, wide sun-soaker leaves on this tall, high yielding hybrid really show off its genetic potential. It is adaptable to lower plant populations while maintaining high tonnage of highly digestible soft starch feed. LH 4940 conv/Lfy is a top choice even in stressful environments. A later flowering hybrid that moves

**HYBRID ADVANTAGES**

- Exciting new silage specific Lfy in a conventional hybrid
- Big, wide sunsoaker leaves
- Stress tolerant hybrid with late season staygreen
- Consistent performance even with reduced plant populations

**DISEASE RATINGS**

<b>Gray Leaf Spot</b>	<b>Southern Leaf Blight</b>	
<b>Eye Spot</b>	<b>Common Rust</b>	
<b>Anthracnose Stalk Rot</b>	<b>Goss's Wilt</b>	2.0
<b>Northern Leaf Blight</b>		

**OVERALL CHARACTERISTICS**

<b>Corn on Corn</b>	3.0	<b>Emergence</b>	2.0
<b>Suggested Population</b>	24-30	<b>Flowering For Maturity</b>	ML
<b>Herbicide Sensitivity</b>	*	<b>Cob Color</b>	Pink
<b>Foliar Fungicide</b>	R	<b>Husk Cover</b>	Medium
<b>Drought Tolerance</b>	1.5	<b>Shank Length</b>	
<b>Test Weight</b>	2.5	<b>Number of Kernel Rows</b>	*
<b>Drydown</b>	3.0	<b>Ear Type</b>	SF
<b>Stay Green</b>	1.5	<b>Silage Rating</b>	1.0
<b>Root Strength</b>	2.8	<b>Leaf Angle</b>	Determinant
<b>Stalk Strength</b>	2.2	<b>Ear Height</b>	MH
<b>Early Vigor</b>	2.3	<b>Plant Height</b>	T

1: All Rating Scales are 1 to 5; (1 = Excellent, 5 = Poor, 0 = No Score)

2: Herbicide Sensitivity: PI = Pigment Inhibitors, Pre PI = Pigment Inhibitors applied Pre-Emergence, SU = Sulfonyleureas, GR = Growth Regulators
